

2020 Family Health Events

In February 2020 Give Every Child a Chance Health partnered with French Camp Elementary to present a family wellness event. This event included presenting wellness education information to French Camp families including healthy eating, nutrition, recipes and fitness. Children were able to participate in making healthy smoothies for all to try on the blender bike.

In October of 2020, unable to bring families together in a public event due to Covid 19, GECAC presented a drive through food drive and health event. The event included health kits for families with educational information and tools to stay healthy.
